EDUCATION

Moradabad Institute of Technology
Bachelor of Technology(Computer Science); CGPA: 8.1
S.V.M. Inter College
12th; Percentage : 80.6%

Moradabad, India
Expected: August 2026
Rampur, India
2019 - 2022

SKILLS SUMMARY

- **Languages:** Python, SQL, C++
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, Streamlit
- **Tools:** MySQL
- **ML & NLP:** TF-IDF, Logistic Regression, Text Preprocessing
- **Platforms:** PyCharm, Jupyter Notebook, Visual Studio Code
- **Soft Skills:** Leadership skills, Time Management

WORK EXPERIENCE

- Softpro India Computer Technologies (P) Ltd.** July 2025 - August 2025
- Extracted and transformed structured data from MySQL using complex SQL joins and Pandas, enabling downstream ML analysis.
 - Built a Streamlit-based UI to visualize model predictions, improving interpretability for non-technical users.

PROJECTS

- Business Analytics System (In Progress) | [LINK](#)** September 2025 - December 2025
- Built an end-to-end Call Transcript Sentiment Analysis system using **Python, NLP, and Machine Learning**.
 - Integrated **Whisper ASR** for audio transcription with a duplicate-safe **MySQL** storage pipeline.
 - Trained a **TF-IDF + Logistic Regression** model achieving **~85%** accuracy, with optional **HuggingFace** fallback.
 - Developed a **Streamlit** application supporting CSV upload, batch analysis, and live prediction on unseen calls.
 - Implemented **text preprocessing** (cleaning, stopword handling, lemmatization) for analytics-ready datasets.
- ML Model Data Drift & Performance Monitoring | [LINK](#)** January 2026
- Built an **ML monitoring system** to detect **feature drift and prediction drift** in production data.
 - Trained a **Logistic Regression pipeline** with ColumnTransformer to ensure consistent preprocessing during inference.
 - Implemented **feature drift detection** using mean-shift comparison against stored baseline statistics.
 - Designed **prediction drift monitoring** by tracking changes in positive prediction rate over time.
 - Developed a **Streamlit dashboard** for CSV upload, real-time drift analysis, and model health status (Stable / Monitor / High Risk).
- Exploratory Data Analysis of Netflix Content | [LINK](#)** August 2025
- Performed comprehensive EDA on a dataset of **8,000+** titles, handling data cleaning and preprocessing to ensure data quality.
 - Analyzed content distribution between Movies and TV Shows, revealing a strong platform content imbalance.
 - Examined regional and rating-based trends to identify dominant content categories across major markets.
 - Cleaned and transformed missing and inconsistent fields using Pandas to create an analysis-ready dataset.

CERTIFICATES

- Spoken Tutorial: Java Certificate || [CERTIFICATE](#)** November 2024
- Successfully completed **Java Programming Training** with **course material from IIT Bombay's Spoken Tutorial Project**, demonstrating strong fundamentals in object-oriented programming.
 - Cleared the **online proctored Java examination** with a **score of 75%**, showcasing practical and theoretical proficiency in core Java concepts.
- Cisco: Programming Essentials in Python | [CERTIFICATE](#)** October 2023
- Developed a solid foundation in Python programming, including syntax, data types, control structures, and functions.
 - Acquired skills in using Python for data analysis and manipulation, and learned about the various libraries and tools available for these tasks.
